

Bring back the smiles

Gentle relief for a blocked nose

When a cold blocks your baby's little nose, your darling can soon become completely miserable. He may well have trouble breathing, feeding and even sleeping normally.

FESS Little Noses[®] saline spray provides gentle relief of nasal congestion. It's a non-medicated and preservative free solution, so it can be used as often as your baby needs.

Just a few sprays will help thin and loosen excess mucus.

And we include a special aspirator to help you clear away the mucus. So keep **FESS Little Noses**[®] handy when your baby's next cold arrives.

Helps baby breathe easier, naturally

Available from pharmacies nationally. Find out more about **FESS Little Noses** at www.fess.com.au or call 1800 788 870.

Always read the label. Use only as directed. If symptoms persist, see your healthcare professional. Contains purified seawater equivalent to 9mg/mL Sodium Chloride.
