

Care for the little things in life

When your little one has a blocked nose or sore eyes, they need a little tender loving care from more than only mum and dad. That's where **FESS Little Noses**[®] and **Little Eyes**[®] come in. Using specially formulated ingredients, they'll help provide gentle relief for babies.

FESS Little Noses provides non-medicated relief when your baby's blocked nose disrupts their sleep, nursing or feeding. The gentle saline solution will help thin and loosen excess mucus. The soft-tip aspirator then gently removes the mucus so baby can breathe more easily. FESS Little Noses is available in both a spray and drops.

Little Eyes hypoallergenic wipes are perfect for wiping away ocular secretions and residue without stinging. They're amazingly gentle on the delicate eye area, and ideal for cleaning between the lashes without needing to rinse afterwards.

FESS Little Noses and **Little Eyes** are suitable from the day baby is born.

Available from pharmacies nationwide

Find out more about FESS Little Noses at www.fess.com.au, and Little Eyes at www.littleeyes.com.au. Alternatively, call 1800 788 870.

Always read the label. Use only as directed. If symptoms persist, see your healthcare professional.
Spray contains saline solution equivalent to 9mg/mL Sodium Chloride. Drops contains 7.040mg/mL Sodium Chloride.
